

Research Cyberinfrastructure Colombia Workshop 2018

How to apply

Approximately half of the participants will be selected through the open application process. A travelling and accommodation allowance is available for participants from outside Bogota DC if required. Priority will be given to participants from Colombia and the UK, but there is a quota for international experts and facilitators.

Please [apply](#), if you belong to one of these group of stakeholders in Colombia (and have not already been contacted):

Users (e-Scientist)

- Active group-leaders with a lot of biological data
- Applied bioinformatics

Resource providers

- Data management
- Tool developers
- Core bioinformatics
- HPC managers

Businesses

- Biotech, agritech industry
- Relevant Innovators

Other Stakeholders

- Funding bodies
- Physical infrastructure (Power, networking, datacentres, etc)
- Research communities
- Relevant NGOs

In order to apply you will need to:

Answer these three questions below in the online application,

Q1: How could your professional background, interests and expertise contribute to the aims of this workshop? (Max. 300 words).

Q2: Please describe your approach to teamwork, any experience(s) contributing to previous workshops or events, and/or how you communicated effectively (Max. 300 words).

Q3: What do you hope to gain from participating in the workshop? (Max. 300 words).

**Obtain a letter of support from your Head of Department or equivalent figure.
Provide a Curriculum Vitae (Ideally summarized to 2 pages).**

Please spend some time considering your answers to the application questions. Your responses will be used to distinguish your application and highlight how you have the attitude and personal skills necessary to participate in the workshop.

Applications will be scored based on the following:

- Relevant expertise and experience
- Ability to develop creative research ideas in a collaborative environment
- Potential to contribute to the scope of the workshop
- Ability to work in a team across academia
- Ability to communicate and engage with a diverse range of stakeholders
